

Modbus Media Converter

HashStudioz introduces the Make in India High-Performing RS-485 to Ethernet Converter, designed for industrial automation, smart city applications, building management systems, energy monitoring, and logistics.

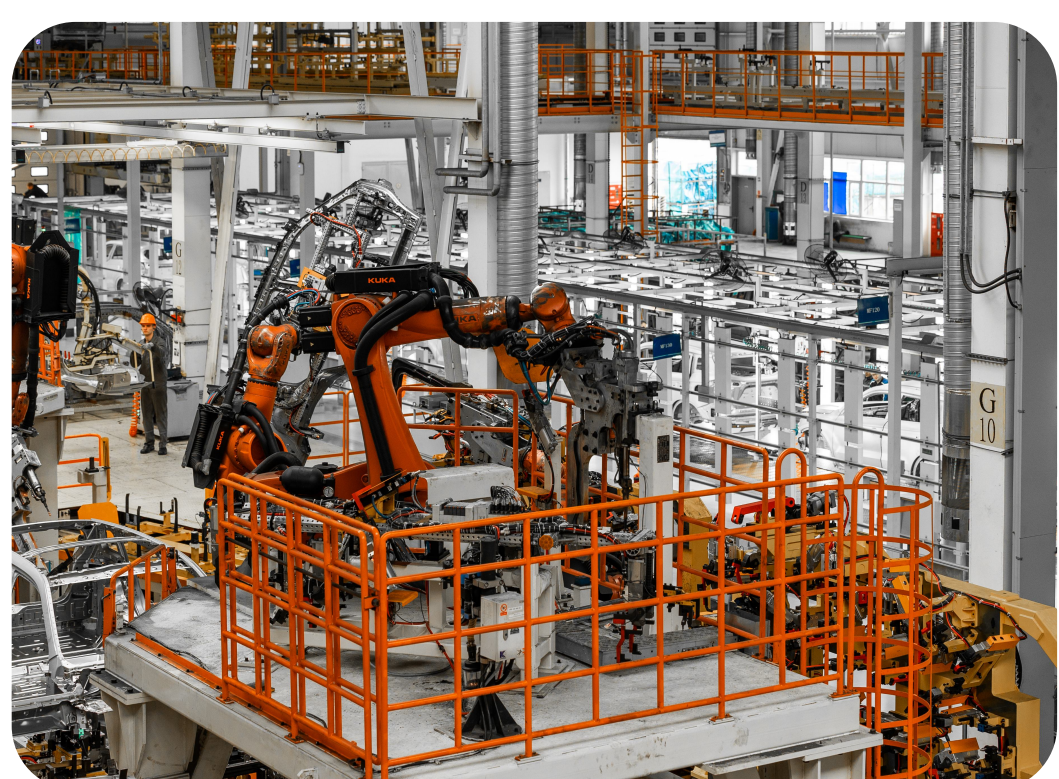

This device enables seamless communication between RS-485 serial equipment and Ethernet networks, ensuring high-speed, stable, and reliable data transfer — all at an unbeatable price.

Specifications

Communication Port	RS-485
Network Interface	Ethernet (TCP/IP)
Operating Modes	TCP to RTU mode, Transparent Mode
Configuration	Web Browser
Input Voltage	DC 4.75–12V
Form Factor	Compact & lightweight for panel and DIN rail mounting
Operating temperature	10kb/sec
Humidity range	5V DC
Applications	STA

Use Case

Industrial
Automation

BMS Monitoring

Logistics

Smart Cities

Energy
Monitoring
